

The Protector Expanding Safety Gate

Features & Benefits

Redirect pedestrian traffic around potential hazards with these highly visible expanding temporary barriers.

Expands to 11' 10" long and stores in a compact 17" length.

Sturdy tubular steel construction is easy to set up and folds for convenient storage. Barrier has a handle that connects to the opposite end post to create a variety of configurations while connecting many units together. Has a high-gloss powder-coated finish. For indoor and outdoor use.

The Protector expandable partition has built in unit to unit connectors to gang multiple units together.

Applications

The Protector expandable partition prevents unintentional access to hazardous construction areas. The durable construction of this product is suited well for hazardous locations.

The Protector easily creates a barrier to temporarily restrict access.

Pricing: Only \$169.00
